

Watson Wheel **Flat-Proof Tires**

Tired of Flats?

Imagine no Flats from:

- tube leaks • worn valve stems
- worn tires • long storage
- under/over inflation
- nails • screws • wire
- broken glass
- broken concrete

15" wheel available in Blue, Red, Green, Yellow, Orange and Standard Black

10" wheel available in Rib and Sawtooth Thread

Increase Productivity:

- no down time
- reduce employee fatigue
- eliminate equipment loss with easy to identify coloured wheels (great for rental companies and landscapers)

Standard Features:

- flat-proof solid polyurethane tire
- colours available in 15" standard model only (Blue, Red, Green, Yellow, Orange and Standard Black)
- 6" steel centered hub welded to 8" diameter 1 piece wheel complete with 5/8" double ball bearings and grease fitting
- 5/8" cold rolled steel axle, plated in nickel, axles equipped with protectors, washers and cotter pins
- durable and lightweight • non-marking • chemical resistant

Microcellular Polyurethane Tires provide a soft, air-cushioned ride. Each tire is made of hundreds of microscopic air cells trapped in a matrix of incredibly tough polyurethane. The result is a tire that is amazingly lightweight, incredibly durable and significantly easier to roll.

16" Wheel Diamond Tread (construction)

16" Wheel Smooth Tread (roofers)

Applications:

- Wheelbarrows
- Pressure Washers
- Generators
- Lawn Trailers
- Garden Tractors
- Nursery Carts
- Wagons, etc.

15" Wheel available in colours listed above
